

KlenGas

Merged 2 pull requests from Karan

Static pages created, Contact form created(form handling pending), Main page created with carousel.

Major Update #1

✓ Fixed Hero section and carousel into one component called "merged" and added it to the Switch Router

✓ Fixed Link in Navbar (Shouldn't import it as

```
import {BrowserRouter as Router, Switch, Link, Route} from 'react-router-dom'
```

Instead, import {Link} from 'react-router-dom';)

✓ Tested routing of the pages,

Bug : Navbar Component breaks in responsive mode, css fix required.

Commit

Added about us page and redirected router from navbar to the page (responsiveness pending...)

Commit:

Added footer + minor changes.

Commit:

Industries navbar dropdown all pages creates + Card UI implemented. Added klengas official logo in the navbar with homepage redirection
